Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 8, 2006 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 6, 7 and 10-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,672,200 to Duffy et al. in view of US 3,518,933 to Weber.

Duffy shows a timed cycled beverage forming system as seen in Fig. 1 having a storage tank 14, a metering chamber 18 in fluid communication with the storage tank, a brew chamber 46 in fluid communication with the metering chamber, a supply system with an air pump 48 to cause the flow of liquid from the storage tank, the user of level sensors in the metering chamber, see column 9, lines 14-16, a heater 68, a disposable cartridge 46 with beverage medium and filtering element. Duffy lacks the storing chamber located physically separate from the storage tank. Weber shows a beverage forming system as seen in Fig. 1 having a metering chamber 1 located physically separated from the storage tank 30. It would have been obvious to a person

with ordinary skill in the art at the time the invention was made to modify the device of Duffy to avoid the use of moving parts and seals constantly exposed to height temperature as taught by Weber.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cortese shows an espresso coffee machine. Stoner shows a percolator. Snowball shows a coffee making apparatus.
